

Perinatology Supplement to Application for Medical Professional Liability Insurance

AZ

Perinatology – Consulting Only (80916)

Physicians in this classification are complementary to obstetricians in providing consultations for complicated obstetrical patients both before (pre-conceptual counseling) and during any trimester of pregnancy as well as the immediate post partum period. Continuing care is not provided (i.e. the obstetrician will not transfer the care to the consulting perinatologist). All patients have a primary obstetrician and may be seen by other subspecialists for underlying medical problems. A consulting only perinatologist may admit a patient for the purpose of stabilization of a high risk medical condition, not including delivery.

My practice is limited to the following:

- Do NOT perform deliveries or take hospital call for delivery. Yes No
- Supervision of residents does NOT include delivery. Yes No
- Perform various consultative, diagnostic procedures including:
 - Diagnostic laboratory testing and interpretation. Yes No
 - Fetal monitoring strip interpretation including stress and non-stress testing and biophysical profiles. Yes No
 - Comprehensive obstetrical ultrasound Yes No
 - Chorionic villus sampling and genetic amniocentesis including genetic consultations in conjunction with team members such as geneticist. Yes No
 - Do NOT perform umbilical cord sampling or fetal transfusions. Yes No
 - Do NOT perform in utero fetal procedures. Yes No
